4) FIRST AID MEASURES:

Description of First-Aid Measures:

Inhalation:

Remove patient to fresh air. Loosen clothing around neck. Lie down and keep warm and rested. If breathing is shallow or has stopped ensure airway is clear and apply resuscitation. Seek medical assistance if symptoms develop or persist.

Skin contact:

Immediately remove contaminated clothing, wash body gently but thoroughly with water. Wash contaminated clothing thoroughly before re-use. Seek medical assistance if irritation persists.

Eye contact:

Flush eyes with plenty of water for at least 15-20 minutes holding eyelids open. Remove contact lenses. **Seek medical assistance if immediately.**

Ingestion:

Never give anything by mouth to an unconscious person. If safe to do so, rinse mouth out with water. Induce vomiting. If For advice, contact the National Poisons Information Centre (012 664 1100) (Unitas hospital). Make every effort to prevent vomit from entering the lungs by careful placement of the patient. **Seek medical assistance immediately.**

Most important symptoms and effects, both acute and delayed:

Suspected of causing cancer.
Inhalation: Danger of serious damage to health by prolonged exposure through inhalation. Harmful if inhaled.
Skin contact: May cause an allergic skin reaction.
Eye contact: Causes serious eye damage.

Indication of any immediate medical attention and special treatment needed:

Treat symptomatically and supportively. If ingested, perform gastric lavage and administer activated charcoal.

5) FIRE-FIGHTING MEASURES:

<p>Extinguishing Media:</p> <p>Unsuitable Extinguishing Media:</p> <p>Specific Hazards arising from the substance/mixture:</p> <p>Fire Fighting:</p> <p>Protective clothing:</p>	<p>In case of a small fire: foam or dry chemical, carbon dioxide. In case of a large fire: Water spray, fog or regular foam.</p> <p>High volume water jet due to contamination risk.</p> <p>If involved in a fire, the dehydrated components may emit oxides of carbon, oxides of nitrogen, hydrogen chloride and hydrogen flouride.</p> <p>Remove spectators from surrounding area. Isolate the fire area and evacuate downwind. Use a recommended extinguishing agent for the type of surrounding fire. Fight fire from maximum distance and use unmanned hose holder or monitor nozzles. Contain fire control agents for later disposal. Avoid inhaling hazardous vapours and fumes from burning materials. Keep upwind. Remove container from fire area if possible and without risk. Water can be used to cool containers but must be contained for later disposal. Do not scatter the material. Dike fire control water. Dispose of extinguishing agent and spillage in a safe way at a later stage.</p> <p>Full protective clothing and self-contained breathing apparatus</p>

Do not flush into surface water or sanitary sewer system. Do not allow to enter drains or watercourses. If contamination of water courses is unavoidable, report to the Police and the Department of Water/Environmental Affairs immediately.</p> <p>Do not eat, drink or smoke during the clean-up process. Clear area of unprotected personnel. Keep people and animals away. Reposition leaking containers to minimize further leakage. Use earthen bunds or absorbent bunding to prevent spreading of spillage. Collect spilled material with shovel, place into a clean container and cover container loosely.</p> <p>Deal with spillages immediately. Do not allow the product to enter drains or water sources. If contamination of drains, streams, watercourses etc. is unavoidable, then warn the local authorities immediately.</p>
