<b>5) Fire-Fighting Measures:</b>	
<p><b>Suitable extinguishing media:</b></p> <p><b>Unsuitable extinguishing media:</b></p> <p><b>Special hazards arising from the substance or mixture:</b></p>	<p>Fine water spray, foam, carbon dioxide, dry chemical powder.</p> <p>Avoid the use of a solid water stream as this may cause spreading.</p> <p>None known</p>
<p><b>Fire-fighting:</b></p> <p><b>Protective clothing:</b></p>	<p>Remove spectators from surrounding area. Isolate the fire area and evacuate downwind. Use a recommended extinguishing agent for the type of surrounding fire. Fight the fire from the maximum distance and use unmanned hose holders or monitor nozzles. Contain fire control agents for later disposal.</p> <p>Avoid inhaling hazardous vapours and fumes from burning materials. Keep upwind. Remove container from fire area if possible and without risk. Water can be used to cool unaffected containers but it must be contained for later disposal. Use as little water as possible. Dyke the fire control water for later disposal. Do not scatter the material. Avoid pollution of waterways. Avoid the accumulation of polluted runoff from the site.</p> <p>Decontaminate all emergency personnel with soap and water before they leave the fire area.</p> <p>Full protective clothing and self-contained breathing apparatus</p>

For personal protection see Section 8.</p> <p>Do not allow this product to enter drains or watercourses. If spill does enter waterways contact the local authority. Spilled product cannot be re-used and must be disposed of by incineration or disposal in a chemical waste disposal facility. If containers cannot be recycled, they should be disposed of together with the waste chemical. Considered a marine pollutant..</p> <p>Do not touch any spilled material. Stop the leakage if it is safe to do so. Wear protective clothing. Clear area of unprotected personnel. Contain and absorb liquid spills with an inert material (such as earth or sand or other suitable non-combustible absorbent material). Remove by scoop or vacuum. Use an approved industrial vacuum cleaner for removal and place into clean, dry, marked and sealable waste containers. If the potential for fire exists, blanket the spill with foam as a precautionary measure. If the product comes into contact with water, contain the contaminated water for later disposal. Prevent the material from spreading by damming it in with absorptive material. Do not flush the spilled material into drains. Keep all spectators away and upwind.</p> <p>Decontaminate the spill area, tools and equipment with a suitable solution (such as organic solvent, detergent bleach or caustic). Add the solution to the drums already collected. Label the drums appropriately and dispose in a safe and approved manner in accordance with local regulations. Open burning or dumping or dumping of this material is prohibited.</p> <p>Do not allow this product to enter drains or watercourses. If spill does enter waterways contact the local authority.
