4) First Aid Measures:

Eye contact:	In case of eye contact, immediately flush the eyes with clean, gently flowing lukewarm water for at least 20 minutes, while holding the eyelid(s) open. Seek medical attention immediately if irritation develops and persists.
Skin contact:	Remove all contaminated clothing, shoes leather goods immediately. Gently wipe off any excess chemical. Wash skin thoroughly and gently with plenty of water and soap. If available, rinse skin with polyethyleneglycol 400, subsequently rinse with water. Do not rub the skin. Seek medical advice if needed.
Ingestion	Have the victim rinse their mouth out with water if the patient is alert and able. Never give anything by mouth to an unconscious person. Treat respiratory difficulty using artificial respiration and oxygen. Treat symptomatically and supportively. Do not induce vomiting. Seek medical assistance immediately.
Inhalation:	Remove affected person to fresh air until recovered. If symptoms develop or persist, seek medical advice. If breathing is difficult, give oxygen. If not breathing stops, apply artificial respiration. Seek medical assistance immediately.
Most important symptoms and effects, acute and delayed:	Ingestion of large amounts: Breathing difficulties, Tremors, Blood disorders, Hyperthermia.
Indication of immediate medical attention and special treatment needed: Advice to physician	No specific antidote known. Treat symptomatically and supportively. This product contains a neonicotinoid. In case of ingestion, gastric lavage should be considered in cases of significant ingestions only within the first 2 hours. However, the administration of activated charcoal and sodium sulphate is advisable.

5) Fire-Fighting Measures:

Suitable extinguishing media:	Water fog, foam, carbon dioxide or dry chemical.
--------------------------------------	--------------------------------------------------

<p>Unsuitable extinguishing media:</p> <p>Fire Fighting:</p>	<p>Avoid strong water jets - airborne dusts may be an explosion hazard.</p> <p>Do not use high volume water jet, due to contamination risk.</p> <p>Remove spectators from surrounding area. Isolate the fire area and evacuate downwind. Use a recommended extinguishing agent for the type of surrounding fire.</p> <p>Fight fire from maximum distance and use unmanned hose holder or monitor nozzles. Contain fire control agents for later disposal.</p> <p>Avoid inhaling hazardous vapours and fumes from burning materials. Keep upwind. Remove container from fire area if possible and without risk. If area is heavily exposed to fire and if conditions permit, let fire burn itself out since water may increase the area contaminated. Water can be used to cool unaffected containers but must be contained for later disposal. Do not scatter the material. Avoid pollution of waterways.</p> <p>UNUSUAL FIRE OR EXPLOSION HAZARDS: Generating poisonous and corrosive fumes. High temperatures of fire may produce irritating gasses and vapours (CO₂ CO and NO_x)</p>
<p>Protective clothing:</p>	<p>Full protective clothing and self-contained breathing apparatus</p>
<p>6) Accidental Release Measures:</p>	
<p>Personal precautions:</p> <p>Environmental precautions:</p> <p>Cleaning procedure:</p> <p>Disposal:</p>	<p>It is good practice to wear suitable personal protective equipment (PPE). For personal protection see Section 8.</p> <p>Keep people away from, and upwind of, the spill or leak.</p> <p>Dike spill area and collect washings to avoid any contamination of surface and ground water, water supplies and drains. Heavily contaminated soil layers should be removed and disposed of in an approved way. Notify regulatory authorities if necessary.</p> <p>Wear protective clothing. Clear area of unprotected personnel. Prevent product from spreading and collect into specially marked, tightly closing containers. Treat contaminated areas with water containing soda or detergent. Rinse the spill area and any tools or implements several times with soapy water. Contain and adsorb the rinsate with inert absorbents and place into the same disposal container as the spill material.</p> <p>Collect spilled material and waste in sealable open-top type containers for disposal. Recover the product by sweeping up or vacuuming without raising dust. If spill does enter waterways contact the local authority. Spilled product cannot be re-used and must be disposed of by incineration or disposal in a chemical waste disposal facility. If containers cannot be recycled, they should be disposed of together with the waste chemical.</p>
